

PHOTO SOURCES - MSN 3008 (N81DW), PILATUS NEWS 2025-09-26		
VIEW	PHOTO (refsf/photos,json id; cand = refs/cand/photos/cand/pn, first-cp12-pro-hando -*)	TAILORED FOR
starboard 3/4, ground	pro3008_sbsd34_pilatus	camera-matched (13 points, 7 px rms), rectified onto the side projection; fuselage strokes, light band, fin cap, escape, leg door
starboard, air-to-air	cand_..._PC_12-PRO-N81DW	camera-matched (10 points, 5 px rms): tail-cone strokes, dark wing lower faces, white bullet, pod
port 3/4, hangar	pro3008_port34 (= cand 130), cand_81_B2	camera-matched_130 (7 points, 6 px rms) and _B1 (7 points, 11 px rms): nose band, gear, light tower nose, blade bands, polished spinner / stacks
port nose, outdoors	cand_...MSN-3008_188	B1 / N1 / P1 run parallel from the cowl front; the all port strokes mirror the starboard ones
starboard wing, flight	cand_...IMG_0459	blue wing upper face, black LE boot, blue winglet with a white line, blue pod with a black radome

NOTES

1. Drawn from the parameters: every coloured area is the ivory parameter dy (mode/ivory/ny) evaluated on the Stage-2 outlines (futselage OML, glazing, openings, wing, empenage, gear, pod) - never from the mesh.
2. Futselage / fin colours are side-projection curves: a surface point (x, y, z) takes the colour of (x, z) , so strokes that reach the crown follow the z (plan). Port - mirror of starboard (the photos show the same shape).
3. Knots measured on the photos camera-matched to the model and rectified onto the side of $(x, y) \rightarrow (0.03-0.05\text{ m})$, the lower nose crosses the port photos (the starboard nose is in the same shape).
4. Near wing drawing as phantom lines over the futselage so the ivory stays visible; propeller: 2 of 5 blades, schematic wading; nose-gear doors open.
5. Estimated: plan-view cross-sections, wingline line position, lower-surface colours between ports, blade band widths ($\pm 1-10\text{ mm}$). No logos, lettering or registration marks are drawn.
